Most Skin Trouble Readily Overcome

The Active Principle of a
Famous Remedy Works
Wonders.

Many people have marveled the way S. S. S. overcomes skin troubles. The explanation is the fact that S. S. S. works in the blood and the blood is really a most intricate and extraordinary mass of arteries and veins.

When you come to realize that the skin and the flesh beneath are composed of a network of tiny blood vessels you solve the mystery.
There are wonderful medicinal properties in S. S. S. that follow the course of the blood streams just as naturally as the most nourishing food elements.
It is really a remarkable remedy. It contains one ingredient, the active purpose of which is to stimulate the tissues to the healthy selection of its own essential nutriment. And the medicinal elements of this matchless blood purifier are just as essential to well-balanced health as the nutritious elements of the meats, grains, fats and sugars of our daily food.
Not a drop of minerals or drugs is used in its preparation. Ask for S. S. S. and just insist upon having it. And if you desire skillful advice and counsel upon any matter concerning the blood and skin, write to the Medical Department, The Swift Specific Co., 529 Swift Bldg., Atlanta, Ga.
Do not allow some zealous clerk's eloquence over something "just as good" as S. S. S. to fool you with the same old mineral drugs. Beware of all substitutes. Insist upon S. S. S.

INCOME TAX IN ENGLAND IS VERY HIGH

One-third of Income from Capital of Five Million Dollars Paid for Taxes.

(BY ASSOCIATED PRESS)
LONDON, June 1—Under the new scheme of taxation introduced by David Lloyd George, chancellor of the exchequer, in his budget for 1914-15, a man having an income from a capital of five million dollars will have to pay one-third of his income in taxes.

In the first place he has to pay twenty-eight cents on every five dollars in income tax; then he has to pay a similar amount in super-tax, and when he dies one dollar on every five of what is left has to be paid for death and estate duties. The total is figured at just under one-third of the income.

Sir Lever Likes It.
This calculation has been made by Sir William Lever, one of the millionaires who will have to pay, but who does not object.

"I like it," he said. "In my view the ideal system of taxation, both local and imperial, is through the income tax, the super-tax, death duties, land tax, site value tax and taxation upon luxuries, such as alcohol, tobacco, etc. Everything else free."

While Mr. Lloyd George has followed his predecessors in his system of taxation, except that he has increased the rate of income and super tax and death duties, so that the wealthy have to pay the lion's share, he has gone to other countries for some of his ideas. His taxation of site values is based on the law now in vogue in British Columbia, while he has gone to the American income tax law for the idea of making money accruing to British subjects from investments abroad pay its share of taxation.

In recent years British capitalists have made immense investments in foreign countries. When the income from these investments was brought home to be spent, the government, under the old law, levied income tax on it; that is, when the government could discover it. But when the income was re-invested abroad, the old law did not touch it. Now Lloyd George says all income of British subjects resident in the United Kingdom must contribute to the imperial revenue. These foreign investments are estimated at over a billion and a half dollars, and from this the chancellor hopes to secure \$1,250,000 this year, and double that amount next year. The total increase of revenue from income tax and death duties this year will amount to something like \$44,000,000.

Burden Smaller.
In spite of these increases, Sir George Paish, editor of the Economist, says the burden of taxation is much smaller than it has been in modern history. In 1880, when the expenditure came to \$515,000,000, it was raised out of a national income of five billion dollars. Now the national income reaches the enormous total of \$13,000,000,000 so it can easily stand the increased expenditure. Sir George argues that England can bear still greater increases in her budget.
"There are good grounds," he says, "for believing that the income and wealth of this country will again double in another thirty years. When it reaches \$25,000,000,000, and I have no doubt that it will within a generation, a budget of two and a half billion dollars will be borne more easily than the burden of a billion dollars in 1914."
